Notes to Catalogue 109

Some comments on values of Churchill speech pamphlets

For many years, one of the most readily found speech pamphlets was the 20th August 1940 speech on "The few." Ten years ago, I would sell these for very low prices. But then a major dealer in New York started promoting this pamphlet as a key collectable, as it appears in a list of milestone publications called *Printing and the Mind of Man* (often referred to as PMM). As a result the current retail price in New York is \$1100.00 for this speech. This pamphlet still turns up in England, but dealers see this and now ask hundreds of pounds for a copy, making it impossible for me to obtain low cost stocks. I do have 4 copies in this catalogue and hope that collectors will be able to buy these before dealers order them.

Most of these pamphlet items are scarce and seldom seen for sale anywhere. The phrases "scarce" and "rare" have become so overused on Ebay, that I have deliberately refrained from using them in the descriptions herein. The fact that they have not been on the market in years should tell you all you need to know. The most difficult to find are those pamphlets from before 1939. The only ones with any sort of survival rate are those published by the Liberal Party from 1904-1915. A selection of these were offered at Sotheby's in December 2002, and realised prices ranging from £358.00-£1900.00, which at current rates works out to \$690.00-\$3650.00. A selection of these Liberal pamphlets is offered at prices well below these auction results.

A good way to judge the rarity is to examine my own records. I have now recorded almost 27,000 Churchill purchases in the past 15 years. I note 52 copies of the first edition (1898) of *Malakand Field Force*, but only two copies of *Shall We Commit Suicide* (see item 18), two copies of *One Continent Redeemed* (see item 93), and only a single copy of the 1945 Election Address (see item 120).

The internet has only served to confirm the scarcity of these items. I spend several hours daily searching and have watched Ebay continuously for 7-8 years, and have seen very few of these items. A lot of the better items have come from collections I have acquired over the years, the largest being that of Michael Wybrow. Most of the old time collections which were started in the 1940's and 50's have now been sold off, and the best items in the legendary Cahn collection have unfortunately gone to a library, where they are lost forever to collectors.

The pamphlets are arranged in two sections. Items 1-157 are those entirely or primarily by Churchill and are arranged by date of first publication. Items 158-178 are pamphlets in which Churchill is not the principal contributor. Woods numbers are used where possible, but there are many items listed which do not appear in Woods.
