Notes to Catalogue 158

It has been many years since I have produced one of these catalogues of speech pamphlets. These were typically produced shortly after Churchill made a speech, and often cheaply made on newsprint or other cheap paper. They were not the sort of thing collectors would put on their shelves next to first editions. The result is a very low survival rate for all but the most prolific.

The internet has only served to confirm the scarcity of these items. I spend several hours daily searching and have watched Ebay continuously for 18 years, and have seen very few of these items. A lot of the better items have come from collections I have acquired over the years, the largest being that of Michael Wybrow. Most of the old time collections which were started in the 1940's and 50's have now been sold off, and the best items in the legendary Cahn collection have unfortunately gone to a library, where they are lost forever to collectors. Some of the best pamphlets from my Catalogue 109 (back in 2005) have now come back to me in the two large collections I have had in over the past few years.

This is the largest catalogue of Churchill pamphlets I have produced. Nearly everything is offered at well below current market prices, sometimes half or less of other offerings.

NEW WEBSITE with really BIG images

The new upgraded WSCBOOKS.COM should be operational by the time you read this. I will be uploading all of the items in this catalogue to the website. You can search and view them with all of the listings having very large (1200 x 1600) images and in some cases multiple images.

Scarce and Rare What do they mean?

These two terms have been much overused. Back in the last century, I attended the rare book school at Colorado College. The consensus amongst the professionals was that a "scarce" item was something that appeared on the market about once a year, whereas "rare" was something that appeared once every five years or less. Most of these pamphlets were published in England, so US dealers have little idea what is seen over there. You may see some ephemeral items such as *Pictures of the Prime Minister's Big Trip* described as rare, but in fact this was something I saw regularly in London and still see on Ebay. I have 6 in stock, which makes it far from rare.

Thus, I have deliberately refrained from overusing these terms in the descriptions herein. The fact that they have not been on the market in years should tell you all you need to know. The most difficult to find are those pamphlets from before 1939. The only ones with any sort of survival rate are those published by the Liberal Party from 1904-1915, and preserved in bound volumes of pamphlets. A selection of these were offered at Sotheby's in December 2002, and realised prices ranging from £358.00-£1900.00, which at then current rates works out to \$690.00-\$3650.00. A selection of these Liberal pamphlets is offered at prices well below these auction results or other current offerings.

A good way to judge the rarity is to examine my own records. I have now recorded over 36,000 Churchill purchases in the past 28 years. I note 66 copies of the first edition (1898) of *Malakand Field Force*, but only a single copy of *The New Commonwealth* (see item 57), two copies of *One Continent Redeemed* (see item 93), and only a single copy of the 1943 Speech on House of Commons Rebuilding (see item 175)
